gravity

The New Force of Certainty in Key Control

Tether Technologies' **GRAVITY** is the first and only industrial-grade, digital tethering solution that automatically preempts master key separation and loss - with absolute reliability. Now you can rest assured of never having to experience a card/key loss event and its costly aftermath.

Never Risk Losing Master Keys or Access Cards Again

GRAVITY doesn't find access cards/keys, because they are never lost in the first place. GRAVITY tethers your cards/keys by using an electronic signal that works as a 5-7 step, mobile barrier around the worker. Upon breaching this radius, **GRAVITY**'s unique alarm, vibration and strobe light are triggered.

Top Features & Benefits

➤ **Preemptive:** As workers do their job, **GRAVITY** does its magic ensuring cards/keys are always kept close at hand.

➤ **Ease-of-Use:** Press on the key unit's thumb release button and return it to the belt unit with a simple click and snap.

INSIDE GRAVITY

Invented by Industry Veteran
GRAVITY was created by Randy Neely, a security industry veteran who saw first-hand the pain caused by losing master keys. After exploring all the key control systems on the market, Randy set out to solve the problem in a unique way - to never lose keys in the first place.

Assembled in the USA
GRAVITY is assembled in Washington State with only the belt clips and casings sourced overseas.

➤ **Three Way Separation Alarm:** When keys separate, the alert is instant and fool-proof. Belt and key units emit unique alarms based on feel (vibration of belt unit), audio (chirp and louder 85 dB alarm on key unit), and visual (strobe on key unit).

➤ **Industrial-Grade Quality: GRAVITY** is designed for industrial environments with usability in mind. The vibration feature can be felt through heavy utility belts and the 85 dB audio alarm can be heard in loud environments. **GRAVITY** runs on standard AAA batteries with an average life of six months. Once batteries reach 20% capacity, a warning chirp alerts users that they need to be replaced.

➤ **Scalability:** Multiple **GRAVITY** units can work in close proximity to one another because each key unit is uniquely married to its belt unit via an RF signal generator.

➤ **Storability:** The key unit can be un-paired from the belt unit and placed in a low-power state for off-shift storage within an access control cabinet. Removal from storage without re-holster to a belt unit causes alarm.

➤ **ROI:** Prevent even one temporary key loss event from happening and **GRAVITY** has paid for itself.

Availability & Pricing

The Tether **GRAVITY** (U.S. Patent 8,836,507 B2) is currently available for purchase in the US and Canada for $199.99 per unit with quantity and dealer discounts available. **GRAVITY** comes standard with a 90 day limited warranty. Extended warranty options are available. Orders can be placed through our web site or by calling 234-206-0304. Shipping, handling, and applicable taxes are extra.
